

## COVID-19 TEST RESULTS

REF #: 22444

Dear BAYLI SHARMA,

You had a BinaxNow AG Card test to determine if you were infected with the COVID-19 virus on 202/ - . 2-0. 10:43:31.147. The test result shows you are **NMQRGFC** for the COVID-19 virus.

Negative results from patients with symptom onset beyond seven days, should be treated as presumptive and confirmation with a molecular assay, if necessary for patient management, may be performed. Negative results do not rule out SARS-CoV-2 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. Negative results should be considered in the context of a patient's recent exposures, history and the presence of clinical signs and symptoms consistent with COVID-19.
